

# **Corporate Finance**

Professor:

**Al-Sadiq Imhamed Belkacem**

Professor of Financial Management  
The University of Tripoli  
Faculty of Economics and Political Science

## Summary

The need and desire to write a book on corporate finance came during my humble experience in teaching corporate finance at the undergraduate and postgraduate levels, which lasted for more than twenty-five years in my academic life, which began as an assistant lecturer, then a lecturer, then an assistant professor, an associate professor, and currently a professor of finance at the University of Tripoli.

Given the need of researchers, specialists, and students of the Faculty of Economics for a reference in corporate finance and to enrich the Arab library in general and the Libyan library in particular to fill the gap in some references that can be a reference and source for researchers and those interested.

I am trying to put this book in their hands for the purpose of benefiting from it, as it consists of fourteen chapters, each chapter deals with a group of advanced topics in corporate finance and explains that in a simplified way and provides solved and simplified examples.

Chapter One: Financial Planning, Chapter Two: Company Value and Financial Decisions, Chapter Three: Fundamental Analysis and Technical Analysis, Chapter Four: Corporate Finance, Chapter Five: Financial Institutions Lists, Chapter Six: Financial Leverage, Operating Leverage and Break-Even Point, Chapter Seven: Futures and Futures Contracts in Companies, Chapter Eight: Mergers and Acquisitions of Companies, Chapter Nine: Options Contracts, Chapter Ten: Financial Structure, Chapter Eleven: Agency Problem and Cost, Chapter Twelve: Corporate Governance, Chapter Thirteen: Dividend Distribution Policy, Chapter Fourteen: Commodity Inventory.
