

السيرة الذاتية
احمد محمد محمد التواتي
استاذ علم ادوية

معلومات شخصية:-
العنوان:
قسم علم الادوية
كلية الصيدلة جامعة طرابلس
نقال: +218925245447

Academic Degrees

PhD (Neurochemical Physiology and Pharmacology), Southampton University, UK, 1994.

Thesis title: Neurochemical studies on the role of glycine as a neurotransmitter in rat brain

Bachelor of Science (Pharmacy), Tripoli, Libya, 1987/88.

Research Interests

1. Neurochemical Pharmacology and neurodegenerative disease.
2. Behavioral Pharmacology.
3. Pharmacy education.

Leadership Experience

1. Curriculum development committee, Faculty of Pharmacy, Tripoli University.
2. Member of Study and Examinations Committee Faculty of Pharmacy, Tripoli University.
3. Member of the postgraduate committee at Department of Pharmacology, Tripoli University, Libya (2005 to 2007)
4. Member of college of pharmacy, Ajman University, accreditation committee (2003-2005)

University Teaching Experience:

1. Professor in Dept. of Pharmacology and Clinical Pharmacy, Faculty of Pharmacy, Tripoli University, Tripoli Libya. (August 2019 – up to date)
2. Associate Professor in Dept. of Pharmacology and Clinical Pharmacy, Faculty of Pharmacy, Tripoli University, Tripoli Libya. (Sep. 2006 – August 2018)
3. Assistant Professor in Dept. of Pharmacology and Clinical Pharmacy, Faculty of Pharmacy, Tripoli University, Tripoli Libya. (Sep. 2005 – Aug. 2006).
4. Assistant Professor in Dept. of Pharmacology, Faculty of Pharmacy & health Sciences, Ajman University of Science & Technology. Ajman - UAE. (Sep. 2003 – Aug 2005).
5. Assistant Professor in Dept. of Pharmacology, and Clinical Pharmacy, Faculty of Pharmacy, Tripoli University, Tripoli Libya. (Sep. 1997 – 2003)
6. Assistant Professor in Dept. of Pharmacology, and oral biology, Faculty of Dentistry, Tripoli University, Tripoli Libya. (Sep. 1994 – Aug 1997)
7. Pharmacology demonstrator for MSc. students at Southampton University 1990-1994.

Courses Taught:**Graduate Courses:**

- 1- Therapeutics and Clinical Pharmacology: Drugs acting on kidney, blood, cardiovascular central nervous system, chemotherapy, endocrinology, and respiratory systems. Phases of clinical trials.
- 2- General Pharmacology: Pharmacokinetic & pharmacodynamic, autonomic nervous system and Physiology of some systems.
- 3- General Toxicology: Toxicokinetics & Toxicodynamic, factors affecting toxicology, chemical carcinogens, teratogens, and genetic toxicology.
- 4- Systemic Toxicology: Toxic responses of several systems (e.g., eye, liver, kidney, skin, heart, blood and respiratory).
- 5- Anatomy and Physiology for Pharmacy Students.
- 6- Biological Assay (screening methods in pharmacology): Principles of biological assay, assay of drugs and screening of compounds for ANS, CVS, CNS, respiratory, etc
- 7- Different pharmacology laboratories techniques for Pharmacy and dental students
- 8- Pathophysiology for Pharmacy Students.
- 9- Biostatistics for Pharmacy Students.

Postgraduate Courses:

1. Pathophysiology and Pharmacotherapy (Clinical Cases)
2. Pathophysiology and Pharmacotherapy I. [Master Program Course]

ACADEMIC INTERESTS

Studies so far have concentrated on the allosteric regulation of the NMDA receptor by glycine in crude synaptic plasma membranes, post-synaptic density membranes, solubilized NMDA receptors and the elucidation of their anatomical pathways using a variety of lesioning techniques (striatal quinolinic acid lesion and frontal cortical lesion) looking for changes in [³H]Glycine uptake. Striatal glycine and glutamate release studies (exogenous & endogenous). And also interested in the study of Alzheimer's, Huntington's, and Parkinson's diseases. Recently, I started looking at the effects of Obesity in children in the Arab countries. Furthermore, studying and evaluating the knowledge among students at Health Sciences faculties and the graduated Pharmacists to serve the community in a better way.

Projects:

I have successfully supervised more than 40 undergraduate student's research projects for the award of BPharm during the last 24 years of my academic carrier. Some of them were published in international journals.

Congress and Workshop Supervision:

1. Libyan Society for Pharmaceutical Sciences, Libyan Board for Medical Specialization (LBMS) and Faculty of Pharmacy, Tripoli University of Medical Sciences. Organized clinical pharmacy workshop days 05, 07, 09, August 2007 Tripoli, Libya entitled: Towards better start of clinical pharmacy in Libya.

Conference:

1. 3RD Libyan Conference on Medical and Pharmaceutical Sciences, University of Tripoli, Alahlia. April 2019.
2. 2nd Libyan Conference on Medical and Pharmaceutical Sciences. University of Tripoli, Alahlia. April 2018.
3. 1st Libyan Medical Research Conference, Faculty of Medicine, University of Tripoli, September 20-22, 2015 Tripoli-Libya.
4. The 1st Scientific Day for the Libyan Graduate Pharmacists. Tripoli, University, Tripoli, Libya 16-21 April, 2014.
5. Title: Pharmacist as a member of primary health care team: Are we ready to take the challenge
6. Union Des Pharmaciens Arabes. 28th Congres Scientifiques. 08-09 February 2013. Alfrane, Maroc.
7. Title: Prescribing pattern of selected agents at general medicine department, Tripoli Central Hospital, Libya.
8. Conducting research in medical practice: professional use of SPSS in medical based research. Libyan Board for Medical Specialization (LBMS), Tripoli Central Hospital, August 2009.
9. The 14th DUPHAT, Dubai, UAE, 2009.
10. Side effects and misuse of antihypertension drugs among elderly in Tripoli. The 6th national pharmaceutical sciences conference Misurata-Libya 2-4 April 2007.
11. Our Children-Our Life-Their health-Our concern. The 2nd Approach Student Scientific Conference. Ajman-UAE, May 2006.

Invited as lecturer for universities and hospitals

1. Tripoli Diabetic Centre. Clinical Pharmacology Continuous Education Program. 02/01/2013, Tripoli, Libya.
2. Tripoli Central Hospital. Clinical Pharmacology Continuous Education Program. 01/01/2013, Tripoli, Libya.
3. Tripoli Paediatric Hospital. Clinical Pharmacology Continuous Education Program. 26 and 31/12/2012, Tripoli, Libya.
4. Pathophysiology and pharmacotherapy for Cardiovascular disease, Parkinson diseases, and Epilepsy. 4th Medical Students. Sebha Medical University. Sebha, Libya (21-26/1/2009).
5. Drug prescribing in elderly, paediatrics, and pregnancy. 4th Medical Students. Sebha Medical University. Sebha, Libya (21-24/3/2008).
6. Teaching of Toxicology Course 5th Year Pharmacy Students. Faculty of Pharmacy, Tripoli University. Tripoli, Libya (January 2008).
7. Teaching of Clinical Pharmacy Course: Pharmaceutical care of CNS disorders: The case of epilepsy. 4th Year Pharmacy Students. Faculty of Pharmacy, Benghazi University. Tripoli, Libya (December 2007).
8. How to maintain normal blood glucose level and how to manage hypoglycemia in diabetic patients? Al-Nekat Alkhams Medical University. Alkhams, Libya (June 28, 2007).
9. SSRI role in depression, Course for MSc students at Faculty of Pharmacy, Al-Arab Medical University. Benghazi, Libya (July 7, 2007).

Invited Examiner:

1. B.Pharm degree final Examinations at faculties of pharmacy in different regions of Libya (Zawiya, Benghazi, Alkhomos and Sabha).
2. MSc Examiner at Libyan Academy in Janzur, Libya.

Consultation:

- * SOH Pharmacotherapy consultant.
- * ASIA Drug import and distribution.
- * Gamma Company for Inspection and Consultancy Ltd.

Training Courses attendant:

- Methods of writing Examinations
- International Pharmacist Graduation Program.
