- Workshop on Antibiotic misuse in Libya, Tripoli-Libya, 02/03/2014
- Episouth Plus final conference, Rome, 20-21 November 2013

RESEARCHINTERESTS

My principal interests lies in the field of Medicine, in which the long term diseases play an important role. My future research plans are to build on the foundations of PhD especially in public health related zoonotic diseases especially those with long term disability and concern (visceral and cutaneous Leishmaniasis), and the evolution of anti-microbial resistance in recent years, also to build up my knowledge about molecular diagnostic methods.
